DESIGN ASSOCIATES, INC.
ARCHITECTURAL INTERIOR DESIGN

November 14, 2014

Dear Friends,

We owe you an enormous thank-you for contributing to our efforts at the Ronald McDonald House of Long Island. Our room generated great response, given all of the incredible product and thought that went into our Chromotherapy Bedroom. The healing room will remain for families to experience for many years to come as a testament to our thoughtfulness and dedication.

Along with the forty other designers involved in Project Design 2014, we all joined hands to transform the facility into a beautiful home with Kitchens, outdoor living spaces, meditation rooms, gym, bedrooms suites, and common family rooms to give families a sense of comfort while they work with their children to becoming healthy and free of disease.

Our room in particular was a highlight of Project Design 2014, for its sophisticated chromotherapy design concept provides-for healing through the power of color and light. Fitted with a complex LED lighting system organized through a Vantage Control System and controlled by a touch-screen keypad, we renovated a bedroom almost completely fitted with mostly low-voltage wiring and indirect lighting to provide a healing environment that stimulates the mind and body through color and light. The bathroom too featured a brilliant custom AKDO mosaic and chromotherapy + aromatherapy spa tub to further the design concept when bathing.

Your efforts to support our mission have been duly noted and your name and company logo appear on a plaque mounted in the room for the families and future visitors to recognize your efforts.

Wishing you and your families health and happiness,

Most Sincerely,

Charles Pavarini III
